Stronger common equity tier 1 in 2015

Guiding 2016

- Good profitability: Target 11% return on equity
- Marginal decline in risk-weighted assets (RWA)
- Runoff of BN Bank's corporate portfolio
- Moderate dividend

Outlook

- Norwegian exports more competitive due to a weaker exchange rate and interest rates stimulate business and household spending.
- Major infrastructure projects helps to ensure good conditions for the region's business and population growth, with moderate unemployment.
- Uncertainty, especially in the petroleum sector, has increased due to lower oil prices. From record high levels, oil investments are reduced with approximately 16% in 2015, and continue decreasing with approximately 10% in 2016.
- Uncertainty about economic developments may dampen demand for loans, while low interest rates work in the opposite direction. We expect stable to slightly declining house prices going forward and still strong competition for new home mortgage customers.
- Long-lasting low oil prices may have negative impacts for the construction sector and the retail sector in the region.
- SpareBank 1 SR-Bank expects in the coming quarters to make loan loss provisions at the same level as so far in 2016.
- Solid earnings from a robust business model indicates SpareBank 1 SR-Bank well positioned to build up the necessary capital going forward, while ensuring continued competitiveness.
- An offensive approach for the future including investing in new technology and focus on accounting services and consulting.
